## EXPERIENCE

### Honeywell Connected Enterprise (HCE)

Jul 2023 – Present

Software Development Engineer 2 | Bangalore, India

### Forge Operation Center (FOC)

Executive Intelligence Dashboard

- Architected and built unified executive dashboard aggregating ~980TB across 30 products, 25K customers, 282K sites, 5M assets, and 85M data points for C-suite and VP-level stakeholders
- Migrated gateway-product mapping from a 4-hour failure-prone Celery batch job to parallelised Kafka consumers with DLQ and automated alerting, reducing runtime by **87%** (4 hr → 30 min)
- Integrated Google Earth API to render a live world map of 40K IoT gateways and 282K customer sites across all Honeywell products

### Platform Health Dashboard

Internal SRE Monitoring

- Built configurable health monitoring platform tracking 50 services across 8 modules, ingesting metrics from InfluxDB, Victoria Metrics, Azure IoT Hub, Databricks, and custom APIs
- Designed zero-code service onboarding via customised Django admin — SREs configure thresholds and data sources without any engineering intervention
- Built OpenAI-powered summary agent surfacing failure patterns, cross-service correlations, and degradation trends over user-selected time ranges

### SaaSOps Portal

SRE Automation Platform

- Built centralised Azure service-principal secret management across 5 tenants and 100+ principals with RBAC, 30-day expiry alerting, and Octopus auto-propagation — eliminating manual secret-sharing dependencies
- Developed DEC operations dashboard tracking ~1,000 tenant jobs with guided customer onboarding, real-time job-status visibility, and failure monitoring across Databricks pipelines

## EDUCATION

### Indian Institute of Technology Kharagpur

2018 – 2023

M.Tech Dual Degree (B.Tech + M.Tech), Electronics & ECE | CGPA: **8.6 / 10** | Minor: CSE (CGPA: 8.75 / 10)

Specialisation: Visual Information Processing & Embedded Systems | Micro-specialisation: Embedded Control, Software, Modelling & Design

- **M.Tech Thesis:** “The Art of Persuasion in the Face of Skepticism: Bayesian Methods for Handling (dis)Trust” | Prof. Amitalok J. Budkuley
- **IEEE ISIT 2024:** “Bayesian Persuasion: From Persuasion toward Counter-suasion” | 2<sup>nd</sup> author

## SKILLS

**Languages** Python, JavaScript / TypeScript, C / C++, SQL

**Frameworks** Django, React, Node.js, Celery

**Infrastructure** Azure (IoT Hub, Event Grid, Service Bus), Kafka, Redis, PostgreSQL, InfluxDB, Victoria Metrics

**Tools** Git, Databricks, OpenAI API, Google Earth / CesiumJS

**Concepts** Microservices, event-driven architecture, multi-agent systems, REST APIs, observability

## AWARDS & ACHIEVEMENTS

- **JEE Advanced 2018** — All India Rank 1050 (Top 0.07% among 1.5 M candidates)
- **IEEE ISIT 2024** — Published “Bayesian Persuasion: From Persuasion toward Counter-suasion”
- **Inter-IIT 2022–23** — Gold Medal, Music Cup (1<sup>st</sup> among all IITs nationwide)
- **NSEA 2017** — State Rank 2, Gujarat (National Standard Examination in Astronomy)
