

Aishwarya Soni

Bengaluru, India

Email: aishujsoni@gmail.com

LinkedIn: aishwarya-soni-554203192

EDUCATION

• Indian Institute of Technology, Kharagpur

2018 – 2023

- *M. Tech Dual Degree (B. Tech + M. Tech), **Electronics & Electrical Communication Engineering**; CGPA: 8.6 / 10*
- Minor: **Computer Science & Engineering** | CGPA: 8.75 / 10
- Micro-specialisation: **Embedded Control, Software, Modelling & Design**

EXPERIENCE

Honeywell Connected Enterprise (HCE)

Bengaluru, India

Software Development Engineer 2

Jul 2023 – Present

Forge Operation Center (FOC):

- Architected and built a unified executive dashboard aggregating ~980 TB across 30 Honeywell products, 25K customers, 282K sites, 5M assets, and 85M data points — providing C-suite and VP-level stakeholders a consolidated single operational view
- Migrated gateway-product mapping from a failure-prone 4-hour Celery batch job to parallelised Kafka consumers with a dedicated consumer group, DLQ, and automated email alerting — reducing runtime by **87%** (4 hr → 30 min) and eliminating manual retriggers
- Integrated Google Earth API for a live world map of 40K gateways and 282K sites; designed PostgreSQL data models with Celery/Redis sync jobs to maintain consistency across 30 integrated products at enterprise scale

Platform Health Dashboard:

- Co-built configurable service-health monitoring platform tracking 50 services across 8 modules and 4 business-region tabs with health states (operational, degraded, critical) and hourly, daily, and weekly time-series trend visualisations per service
- Designed zero-code service onboarding via customised Django admin and integrated metric ingestion from InfluxDB, Victoria Metrics, Azure IoT Hub, Databricks logs, and custom APIs — enabling SREs to extend platform coverage without engineering code changes
- Built an OpenAI-powered AI summary agent to analyse user-selected time ranges and surface full-uptime services, degradation patterns, cross-module failure correlations, and recurring time-of-day incident trends for on-call SRE teams

SaaSOps Portal:

- Built centralised Azure service-principal secret management across 5 tenants and 100+ principals with RBAC-gated retrieval, 30-day expiry alerting, enforced naming conventions, and automated propagation to Octopus — eliminating manual handoffs entirely
- Developed DEC operations dashboard tracking ~1,000 tenant jobs with region and business-group filters, real-time job-status visibility, failure monitoring across Databricks pipelines, and a guided customer onboarding workflow

SKILLS

- **Languages:** Python, JavaScript / TypeScript, C / C++, SQL
- **Backend & Frameworks:** Django, Node.js, Celery, REST APIs, GraphQL
- **Data & Messaging:** Kafka, Redis, PostgreSQL, MySQL, InfluxDB, Victoria Metrics, Databricks
- **Cloud & Tools:** Azure (IoT Hub, Event Grid, Service Bus), Git, OpenAI API, Google Earth / CesiumJS
- **Frontend:** React, HTML5 / CSS3

AWARDS & ACHIEVEMENTS

National Standard Examination in Astronomy (NSEA) — State Rank 2 in Gujarat **2017**
JEE Advanced — All India Rank 1050 among 1.5 million candidates (Top 0.07%) **2018**
Inter-IIT General Championship — **Gold Medal**, Fine Arts Cup (1st among 22 IITs) **2021**
Inter-IIT General Championship — **Silver Medal**, Fine Arts Cup; **Silver Medal**, Music Cup **2022**
Inter-IIT General Championship — **Gold Medal**, Music Cup (1st among all IITs nationwide) **2023**
IEEE ISIT — Published “*Bayesian Persuasion: From Persuasion toward Counter-suasion*” (2nd author) **2024**
Honeywell Performance Excellence Award — **6× Silver** and **1× Bronze** for product & platform engineering. ... **2025–26**
